

# **Syed M Asad Zaidi - Study Plan**

Engineering is a very holistic process, encompassing complex principles across various fields. As an engineer, I have always had an avid interest in creating useful gadgets that facilitate daily processes. I completed my undergraduate degree in Electronics Engineering in August 2014.. After my undergraduate, I started working at Pak Suzuki Motors Comp Ltd

After graduation I joined Pak Suzuki Motors Company as Management Trainee in the maintenance Department .

In March, 2016, I got the opportunity to work with an Auto based company in Karachi as a Production Engineer. My core responsibilities was to fulfill production targets with handling of manpower , vendor dealing , inventory orders and maintenance work. All is under my control to 80 million production targets per month . I resigned from my job in Jan.2018.

After successfully securing permanent residency, I immigrated to Canada in Jan,2018 and settled in Toronto, Ontario. For the past two years I have been working as a Security officer with nationwide security company ltd. Canada and work as a food delivery driver with skip the dishes , uber and door dash. My job description is customer service assistance on customer issues in an efficient manner and documenting emergency reports.

In the future, I hope to use engineering management skills to coordinate efforts between the different fields of engineering in order to make construction safe and speedier. Through this master's program, I will be able to delve deeper into the principles of engineering, ensuring that I thoroughly understand the capabilities and limitations of the current field. Additionally I will be able to work with teams on industry relevant projects giving me a taste of what to expect in my future career, I look forward to using the experience that I receive through this Master program in Engineering Management to enhance and further develop engineering practices in the future.
